The figure is a map of North America, specifically focusing on the United States and parts of Canada and Mexico. It displays a series of colored dots representing data points. The dots are primarily located in the western United States, with a high concentration along the West Coast, particularly in California. The colors of the dots vary, including red, orange, yellow, and green, which likely represent different categories or values. Major cities are labeled on the map, including Los Angeles, Phoenix, Toronto, New York, and Washington. The map also shows geographical features like the Gulf of Saint Lawrence and the Gulf of Mexico. A zoom control is visible on the left side, and a layer control is on the right. The map is overlaid on a web browser interface, which includes a toolbar at the top with various application icons and a file path, and a bottom toolbar with a list of PDF files and a 'Show all' button.
